

Basic Principles and Basic Elements of Design

INTRODUCTION:

Sanjay Ghodawat University, School of Architecture, Atigre conducted a one day workshop on 'Basic Elements and Basic Principles of Design', on 24/08/2018. The workshop was conducted for First Year B. Arch by Prof. Ashwini Joshi. She has passed from LAD College, Nagpur with 4th position in Nagpur University. She has completed her M.Arch in Computer Application and stood 1st and the subject for M.Arch was Decoding Generative System.

The workshop commenced by a brief introduction of the guest Prof. Ashwini Joshi by Ms. Souravi Patil, First Year B.Arch student. Her major interest is in Design, Computer Application in Design and Humanities and History of Architecture.

Prof. Anil Joshi felicitating Prof. Ashwini Joshi

Prof. Ashwini Joshi interacting with students

AIM: The workshop was conducted to learn the Basic Design Elements like point, line and planes.

OBJECTIVES: From the given exercise students should learn to develop a two dimensional composition.

The topics covered in the one day workshop are as follows:

- 1) Basic Elements of Design.
- 2) Basic Principles of Design/Composition.

The students learnt the Basic Design Elements of composition. The assignment was given by using point, line, plane, shape and material

Also, they were acquainted to make a composition which will be visually appealing and from this they further learnt the development from 2-dimensional composition to 3-dimensional

composition which will be useful to make or to implement these components in Architectural Design.

Consecutively there were exercises based on above discussed topics. Following is the work done by student
