Workshop On Introductions to ABAQUS In Association with Tata Technologies

5th & 6th April, 2018

Objectives ►

This programme is intended to make participants familiar with ABAQUS Software. The Software is useful for Analysis of different material like composite material & FG Material.

Content ►

- Introduction to ABAQUS
- Importance or application of ABAQUS
- Different types of model (Plate, wire, shell, channel, I section, column with bars etc)
- Different types of material modeling (Homogeneous, laminated, composite and Functionally graded)
- Different types of supports (Simply support, fixed, pinned etc)
- Different types of analysis (Stress and strain, vibration etc)
- Results development

Eligibility ►

1. Faculty members of Engineering college.
2. PG Students / Research Scholars.

Registration ►

Faculty / PG Students / Research Scholars: 1000/-

Note: Registration excluding food

Resource Person

Experts from

TATA TECHNOLOGIES

High End Simulation & Robotics Labs

- Mr. N. U. Bavane
Co ordinator
- Mr. V.G. Khurd
PG Co ordinator
- Dr. N.K. Patil
HOD
- Dr. V.V. Kulkarni
Director

Contact

- Prof. N. U. Bavane
Mob.: 99707 36974
- Sharayu Joshi
(ME Student)
Mob.: 70573 45406
